Mycro-Tec Lockout

Catalogue number: N/A · Version No: 1.0 · Issue date: July 2026
Safety Data Sheet according to WHS and ADG requirements

SECTION 1 — IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

Product Identifier

Product name	Mycro-Tec Lockout
Synonyms	Manufactured for Hybrid-Ag Pty Ltd by Great Southern Biology Pty Ltd
Other means of identification	Agricultural microbial biostimulant / liquid biological inoculant

Relevant identified uses of the substance or mixture and uses advised against — Relevant identified uses: soil and foliar application in agriculture and horticulture as directed on the product label. Uses advised against: not for human or animal consumption, and no use other than as directed on the label.

Relevant identified uses	Liquid biostimulant for agricultural use

Details of the Australian supplier / source producer

Registered company name	Hybrid-Ag Pty Ltd
Address	52 Buckler Road, Wangaratta VIC 3677, Australia
Telephone	(03) 5722 7555
Source producer	Great Southern Biology Pty Ltd · 0438 031 135
Website	www.hybridag.com.au
Email	support@hybridag.com.au

Emergency telephone number

Association / Organisation	Poisons Information Centre
Emergency telephone numbers	13 11 26 (Australia) · 0800 764 766 (New Zealand)
Other emergency telephone numbers	000 — Police, Fire, Ambulance (112 from a mobile)

SECTION 2 — HAZARDS IDENTIFICATION

Classification of the substance or mixture

NON-HAZARDOUS CHEMICAL. NON-DANGEROUS GOODS according to the Model WHS Regulations and the ADG Code. Not a Dangerous Good by ADG, IATA or IMDG/IMSBC criteria.

Poisons Schedule	Not scheduled (SUSMP).
GHS Classification	Not classified as hazardous under GHS 7 (Safe Work Australia criteria)

Label elements

Signal word	None — not hazardous
Hazard statement(s)	Not hazardous — no criteria found.

Precautionary statement(s)

Prevention	P102 Keep out of reach of children. P262 Do not get in eyes, on skin or on clothing. P281 Use personal protective equipment as required.
Response	P353 Rinse skin with water or shower. P301+P330+P331 IF SWALLOWED: rinse mouth, do NOT induce vomiting. P370+P378 Not combustible — use extinguishing media suited to the surrounding fire.
Storage	P402 Store in a dry place. P404 Store in a closed container.
Disposal	P501 Dispose of contents and containers in accordance with local regulations.

Version 1.0 · July 2026

SECTION 3 — COMPOSITION / INFORMATION ON INGREDIENTS

Substances

All ingredients are non-hazardous.

Mixtures

INGREDIENT	CAS No	% w/w	CONCENTRATION (CFU/mL)
Bacillus amyloliquefaciens	Not allocated	< 1%	> 1×10^{9}
Trichoderma endophyticum	Not allocated	< 1%	> 2×10^{8}
Streptomyces lydicus	Not allocated	< 1%	> 2×10^{7}
Water	7732-18-5	> 97%	—

SECTION 4 — FIRST AID MEASURES

Description of first aid measures

Eye Contact	Flush eyes with lukewarm, gently flowing water for 5 minutes or until removed. Seek medical advice if irritation persists.
Skin Contact	Wash gently and thoroughly with water (non-abrasive soap if necessary) for 5 minutes or until removed.
Inhalation	No first aid normally required. If irritation develops, remove to fresh air and observe; if it persists, seek medical advice.
Ingestion	Do NOT induce vomiting; wash mouth with water and give water to drink. If symptoms develop, contact a Poisons Information Centre or doctor.

Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

SECTION 5 — FIREFIGHTING MEASURES

Extinguishing media

Suitable media	Not combustible — use extinguishing media suited to the surrounding fire. No restriction on the type of extinguisher.

Special hazards arising from the substance or mixture

Fire incompatibility	None known.

Advice for firefighters

Fire Fighting	Alert the Fire Brigade and tell them the location and nature of the hazard. Firefighters to wear self-contained breathing apparatus (SCBA) and suitable protective clothing.
Fire / Explosion Hazard	No risk of explosion under normal conditions. Decomposition may produce hazardous vapours of carbon dioxide, carbon monoxide, nitrogen oxides and ammonia.

SECTION 6 — ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Minor Spills	Clean up and rinse to sewer; place empty container in garbage. Wear impermeable gloves when handling chemical and microbial products.
Major Spills	Contain and sweep into a centralised location; place into labelled drums and dispose per local government regulations. Prevent spillage entering drains or watercourses; notify emergency services if too large to handle safely. May be suitable for approved landfill.

Personal protective equipment advice is contained in Section 8 of this SDS.

SECTION 7 — HANDLING AND STORAGE

Precautions for safe handling

Safe handling	Read the product label before use. Avoid eye or skin contact and inhalation. Observe good personal hygiene; wash hands before eating. Do not eat, drink or smoke in contaminated areas.
Other information	Always store in the original container.

Conditions for safe storage, including any incompatibilities

Storage	Store in a cool, dry area out of direct sunlight, between 5 °C and 40 °C, ideally around 15 °C. Do not freeze. Keep containers labelled, sealed when not in use, and upright.
Storage incompatibilities	Store away from foodstuffs and farm chemicals, including insecticides, fungicides and herbicides.

Package material incompatibilities

Package material incompatibilities	Not Available.

SECTION 8 — EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

Occupational exposure limits (OEL) — Ingredient data	Not Available. No occupational exposure limits established for the ingredients.

Exposure controls

Appropriate engineering controls	Ensure adequate ventilation. No special equipment usually needed when handling small quantities.
Personal protection	For bulk or regular occupational handling, use PPE appropriate to exposure: gloves, long sleeves and eye protection. Refer to AS/NZS 1715, AS 2161, AS 2919, AS/NZS 1336 & 1337 and AS/NZS 2210.
Eye and face protection	Protective glasses or goggles recommended.
Hands / skin protection	Wear gloves or gauntlets and long sleeves. Follow the manufacturer's cleaning instructions; otherwise use detergent and warm water and wash PPE separately.
Respiratory protection	Not required under anticipated use. Where high airborne mist occurs, use a P2 canister respirator; provide eye-wash and safety shower.

SECTION 9 — PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Appearance	Musty, earthy liquid	**Specific Gravity (Water=1)**	1.01
Physical state	Liquid	**Partition coefficient n-octanol/water**	Not Available
Odour	Earthy / musty, fermentation	**Auto-ignition temperature (°C)**	Not Applicable
Odour threshold	Not Available	**Decomposition temperature**	Not Applicable
pH (as supplied)	6–7	**Viscosity (cSt)**	1.0
Melting / freezing point (°C)	Approx 0	**Molecular weight (g/mol)**	Not Available
Initial boiling point / range (°C)	100	**Taste**	Not Available
Flash point (°C)	Not Applicable	**Explosive properties**	Not Available
Evaporation rate	Not Applicable	**Oxidising properties**	Not Available
Flammability	Does not burn	**Surface Tension (dyn/cm)**	Not Available
Upper Explosive Limit (%)	Not Applicable	**Volatile Component (%vol)**	Negligible at ambient
Lower Explosive Limit (%)	Not Applicable	**Gas group**	Not Available
Vapour pressure (kPa)	Not Available	**pH as a solution**	6–7
Solubility in water	Miscible	**VOC (g/L)**	Not Available
Vapour density (Air=1)	Not Available		

SECTION 10 — STABILITY AND REACTIVITY

Reactivity	Unlikely to react or decompose under normal storage conditions.
Chemical stability	Stable under normal storage conditions.
Possibility of hazardous reactions	No known hazardous reactions; polymerisation is unlikely.
Conditions to avoid	Heat, flames and direct sunlight.
Incompatible materials	Strong oxidisers, caustics, acids and hypochlorites.
Hazardous decomposition products	No hazardous decomposition products are known to occur from this product.

SECTION 11 — TOXICOLOGICAL INFORMATION

Information on toxicological effects

Target organs	No data indicating any particular target organs.
Inhaled	Available data indicates the product is not harmful. Mists/spray may cause irritation to the nose, throat and respiratory system, including coughing and discomfort.
Ingestion	May cause mild irritation to the mouth, throat and stomach.
Skin Contact	May cause mild irritation but unlikely to cause more than mild, transient discomfort.
Eye	May be mildly irritating; unlikely to cause more than mild, transient discomfort.
Chronic / Carcinogenicity	Extended contact may irritate sensitive individuals. No significant ingredient is classified as carcinogenic by SWA, NTP or IARC, and no ingredient listed in the HSIS database is present at hazardous concentrations. As with any microbial product, may cause harm to immunocompromised individuals. Such persons should avoid handling this product.

Version 1.0 · July 2026

SECTION 12 — ECOLOGICAL INFORMATION

Toxicity

Unlikely to adversely affect the environment — contains naturally occurring ingredients. No specific ecotoxicity data available.

Persistence and degradability

Ingredient	Persistence: Water / Soil	Persistence: Air
All ingredients	Biodegradable; no data available for all ingredients	No data available for all ingredients

Bioaccumulative potential

Ingredient	Bioaccumulation
All ingredients	No data available for all ingredients

Mobility in soil

Ingredient	Mobility
All ingredients	No data available for all ingredients

SECTION 13 — DISPOSAL CONSIDERATIONS

Waste treatment methods

Product / packaging disposal	Recycle containers whenever possible. The product is biodegradable; residues and containers should be disposed of per local government regulations. For a major spill, prevent entry to drains or watercourses and call emergency services; may be suitable for approved landfill.

SECTION 14 — TRANSPORT INFORMATION

Labels Required

Marine Pollutant	No
HAZCHEM	Not Applicable
UN Number	None allocated

Land transport (ADG): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS. Not regulated by IATA (Air) or IMDG/IMSBC (Sea).

SECTION 15 — REGULATORY INFORMATION

Safety, health and environmental regulations / legislation specific for the substance or mixture

All ingredients are listed on, or exempt from, the Australian Inventory of Industrial Chemicals (AIIC). SUSMP Poisons Schedule: Not scheduled. Use remains subject to applicable state agvet and fertiliser control-of-use requirements.

SECTION 16 — OTHER INFORMATION

Classification has been carried out against GHS 7 (the 7th revised edition of the GHS, mandatory in Australia since 1 January 2023), drawing on official and authoritative sources. This SDS is a hazard-communication tool to assist risk assessment; scale of use, frequency and available engineering controls must be considered. Prepared in accordance with the current Safe Work Australia model Code of Practice: Preparation of Safety Data Sheets for Hazardous Chemicals. Version 1.0. Date of preparation: 3 August 2026. First issue — no prior revision.

Definitions and abbreviations

PC-TWA: Permissible Concentration, Time-Weighted Average · PC-STEL: Permissible Concentration, Short-Term Exposure Limit · IARC: International Agency for Research on Cancer · ACGIH: American Conference of Governmental Industrial Hygienists · STEL: Short-Term Exposure Limit · TEEL: Temporary Emergency Exposure Limit · IDLH: Immediately Dangerous to Life or Health · OSF: Odour Safety Factor · NOAEL: No Observed Effects Level · TLV: Threshold Limit Value · LOD: Limit of Detection · OTV: Odour Threshold Value · BCF: Bio-Concentration Factors · BEI: Biological Exposure Index.
